MEMORANDUM TO : Project Director of Materiel

SUBJECT : Transfer of Aircraft to FOG

1. This memorandum formally notifies you of the recent exchange of our Articles 348 and 350 for FOG's 367 and 378. FOG has requested that the associated equipment normally transferred with each aircraft be exchanged with FOG.

2. Lt. Col. Brewer has requested information on available 263 equipment which is excessive of the Project. For example, he has a need for up to 4 additional fuselage carts and additional wing carts. I have assured FOG that we will transfer to them any such equipment in excess of our needs. It would be appreciated if you work out details and necessary documentation on an appropriate transfer of these or other items which are in excess to Project needs.

3. In addition to the aforementioned exchange of aircraft an additional two aircraft (Nos. 347 and 356) have been transferred to FOG. These are not exchanges but rather transfer to FOG of aircraft excess to our needs for the coming season. Appropriate transfer of such 263 and related equipment to FOG should be made, provided such equipment is also surplus to our needs. Again, appropriate documents of such transfer of AC and equipment should be recorded.

15  
Col. J. A. Gibbs
